

3G CAMERA WITH SIMPLICITY AND STYLE

We believe that your monitoring, surveillance solutions should be flexible, reliable and easy to deploy. That is why we use some of the most advanced and proven technologies that are available in the world to date.

This extra thin 3G camera is designed to fit into tight space. It offers monitoring solutions for: offices, labs, homes, out-buildings, empty premises, vehicles as well as covert operations and remote locations. The camera can work on battery up to 50 hours standby time, and it will be recharged when the power is plugged in.
